

Paessler and Martello Announce Strategic Partnership for Enterprise IT Infrastructure Monitoring

Integration of PRTG Network Monitor with Martello's Savision iQ Provides Network Administrators A Consolidated View of IT Systems and Adds Analytics Capability to Discover, Analyze and Resolve IT Issues to Maximize Uptime

NUREMBERG, Germany, Feb. 04, 2019 – [Paessler AG](#), the innovative network monitoring specialist, today announced that Savision, a subsidiary of network performance management solutions leader Martello Technologies Group (“Martello”) (TSXV:MTLO), has joined the [Paessler Uptime Alliance](#) to offer PRTG users a consolidated view of all IT systems from a single dashboard using the Savision iQ software. First announced in April 2018, the alliance is designed to help the company’s partners integrate comprehensive, advanced IT infrastructure monitoring in their offerings to help prevent downtime of critical IT systems.

PRTG is an all-in-one unified monitoring solution that makes it easy for IT professionals to know what is happening across their entire IT infrastructure, including networks, systems, hardware, applications and devices, at any point in time. With more than 200,000 installations, PRTG is one of the world’s leading IT monitoring solutions.

Martello’s Savision iQ software transforms infrastructure and application monitoring data into dashboards that automate and unify IT operations with IT service management workflows. Savision iQ integrates with more than 35 applications, including the PRTG enterprise IT monitoring solution.

The Savision iQ and PRTG out-of-the-box integration provides a solution that discovers, analyzes, and even solves IT issues before they become a problem. The combined solution gathers information from multiple sources such as monitoring tools, cloud platforms, and ITSM systems. PRTG monitors the entire IT suite on a 24/7 basis and sends issues and anomalies to Savision iQ. These issues are correlated and analyzed using automated incident workflows for improved troubleshooting and resolution. Savision iQ is designed to handle a large volume of data, allowing multiple PRTG instances to be rendered and viewed in a single dashboard. This makes the solution suitable for networks of all sizes.

“Martello is delighted to join the Paessler Uptime Alliance Program,” says Stefanie Richheimer, chief revenue officer at Martello. “A true technology partnership should benefit customers of both companies, and I believe the combined solution will prove this in the short-term. The combination of best-in-class monitoring with big data analytics and dashboards provides an Enterprise class solution ready for large-scale IT environments.”

“It’s well-known that system outages seriously impact enterprise bottom-line performance,” says Paessler AG CEO Christian Twardawa. “Our Uptime Alliance program offers the opportunity to combine best-of-breed technology, in this case the Savision ITOps solution, with PRTG to not only to detect system failures in the enterprise as soon as they occur, but to also track long term changes in network performance and network usage. It is critical for businesses to identify potential problems before they become a serious threat.”

About Paessler

In 1997 Paessler revolutionized IT monitoring with the introduction of PRTG Network Monitor. Today over 200,000 IT administrators, in more than 170 countries, rely on PRTG to monitor their business-critical systems, devices and network infrastructures. PRTG monitors the entire IT infrastructure 24/7 and helps IT professionals to seamlessly solve problems

before they impact users.

Our mission is to empower technical teams to manage their infrastructure, ensuring maximum productivity. We build lasting partnerships and integrative, holistic solutions to achieve this. Thinking beyond IT networks, Paessler is actively developing solutions to support digital transformation strategies and the Internet of Things.
