

Paessler Demonstrates Power of PRTG at Interop Las Vegas

Company to highlight its network monitoring solution at the show, will participate in InteropNet

WAKEFIELD, Mass. And NUREMBERG, Germany, May 2, 2016 – [Paessler AG](#), the innovative network monitoring specialist, today announced they will be demonstrating the power and usability of PRTG Network Monitor at Interop Las Vegas, May 2-6, 2016, at the Mandalay Bay Convention Center (Booth #549). At the show, Paessler will highlight new features including sensor types for monitoring business processes and Docker containers, and will also be participating in InteropNet, the network that will power the show and display the power of true interoperability.

PRTG Network Monitor is a fully-featured, comprehensive monitoring solution capable of monitoring everything from routers and switches to virtual machines and cloud applications. PRTG will be in use in the InteropNet network, monitoring the network that serves the show, and will be demonstrated at the InteropNet Demo Lab on May 5 at 11 a.m. Paessler will highlight two features:

- **Business Process Sensor** – Gives IT the ability to monitor the health of an entire business process, combining multiple sensors to gain insight into the availability and performance of critical operations.
- **Docker Container Sensor** – Enables users to monitor Docker containers, delivering critical insights into performance, availability, CPU usage, traffic in/out and more.

“Over the course of the past year we’ve introduced new features that make PRTG even more dynamic and flexible, which keeps close to the core message of Interop – that interoperability matters and that everything should work together in a way that makes an IT administrator’s life better,” said Andrew Cutting, Director of Channel Sales, North America, Paessler. “Interop is one of the best opportunities of the year to reach out and interact directly with the types of in-the-trenches users who directly benefit from comprehensive monitoring.”

ABOUT INTEROP®

Interop is the leading global IT infrastructure event series, offering in-depth education alongside a showcase of emerging technologies in an independent, vendor-neutral environment. For 30 years, Interop has brought the IT community together to explore the latest in network infrastructure, encouraging collaboration and interoperability. Through dynamic conference programs, Interop helps professionals at all career levels leverage the network, systems and applications that enable business innovation. The Interop Expo and InteropNet Demo Lab provide immersive, hands-on experiences, while connecting enterprise IT buyers with leading suppliers. Interop Las Vegas is the flagship event held each spring, with an annual event in Tokyo and Cloud Connect China in Shanghai. For more information, visit interop.com. Interop is organized by UBM Americas, a part of UBM plc (UBM.L), an Events First marketing and communications services business. For more information, visit www.ubmamericas.com.

About Paessler AG

Paessler AG’s award winning PRTG Network Monitor is a powerful, affordable and easy-to-use Unified Monitoring solution. It is a highly flexible and vendor-neutral software for monitoring IT infrastructure, already in use at enterprises and organizations of all sizes and industries. Over 150,000 IT administrators in more than 170 countries rely on PRTG and gain peace of mind, confidence and convenience. Founded in 1997 and based in Nuremberg, Germany, Paessler AG remains a privately held company that is recognized as both a member of the Cisco Solution Partner Program and a VMware Technology Alliance Partner.
