

Paessler Partners with Red Education to Deliver PRTG Training

Appointment marks first official training partner in APAC as part of ongoing commitment to region

SYDNEY, Australia – 04 October 2016 – Paessler AG, the innovative network monitoring specialist, today announced a cooperation with Red Education to provide training of PRTG Network Monitor. The partnership will provide attendees with the knowledge and skills needed to successfully implement the network monitoring solution.

The partnership comes on the back of Paessler bolstering its team in May as it continues to focus on driving growth in the region. As the inaugural APAC PRTG training partner, Red Education will provide online and onsite training starting with four dates (see below).

Said George Wilson, Senior Sales Manager for Australia and New Zealand at Paessler AG, “Red Education is a welcome addition to the PRTG Network Monitor team. We’re excited that we can now offer our customers this new training feature to ensure they receive a seamless adoption and transition. We chose Red Education because of their history, reputation and ability to understand technology.”

The training, PRTG: How to Install, Configure and Monitor, covers implementation, licencing, monitoring, administration and learning of the advanced and specialised features and applications. Split over two days, this course explores practical and theoretical concepts designed to engage and provide understanding of PRTG software.

Said Rob Howard, Managing Director at Red Education, “Red Education is delighted to have been appointed the Authorised Training Centre for Paessler AG in Asia Pac. We’ll be providing training to their customers and partners across the region conducted by our award winning instructors, in classroom, virtual and on site classes. I’m really happy about it because there are already over 1,000 deployments of PRTG in the region, and growing fast. We like to get in early and identify players with great technology that have a bright future, and Paessler AG is definitely one of those.”

Students who participate in the training will be eligible for one-time access to sit the [PRTG monitoring certification](#) exam at no extra cost.

For more about the training or to register, please visit [Red Education](#) or [Paessler](#).

Initial Course Dates

Start Date (2 days)	Location
Mon, 10/10/2016	Sydney
Mon, 24/10/2016	Virtual
