

Paessler to Showcase Multiple Improvements for its PRTG Network Monitor Benefitting VMware Users at VMworld US 2014 in San Francisco, August 24-28

Austin, Texas and Nuremberg, Germany (August 12, 2014) - [Paessler AG](#), the innovative [network monitoring solutions](#) specialist, today announced it will be participating in VMworld US for the first time in order to showcase its flagship product, [PRTG Network Monitor](#) for interested visitors. Recent enhancements bring new levels of efficiency and control to VMware users, increasing speed, versatility, applicability, and management control within VMware networks.

PRTG Network Monitor enables IT administrators to continuously monitor the health of their entire infrastructure. The solution's capabilities are of particular benefit to VMware users who must be kept aware of the performance of their entire VMware network—their VMware hosts, the hardware the virtual servers are running on, and the applications running on the VMware.

“Paessler is continually looking at new ways to make monitoring easier and more efficient for VMware users,” said Dirk Paessler, founder and CEO of Paessler AG. “We’re excited to show VMworld San Francisco attendees how PRTG can help them to assure their VMware’s best performance and maximum reliability.”

PRTG Network Monitor provides an overview of the entire enterprise investment—virtual applications, hardware, networks, traffic, email, websites and much more. Over 150,000 administrators at enterprises around the world use the software every day, including many that depend on VMware for their most critical tasks.

Paessler will be showcasing PRTG Network Monitor from its VMworld US 2014 exhibit at Booth 312 in Moscone Center, August 24-28.
